NEW BLUE NISSAN LONG LIFE ANTIFREEZE/COOLANT

SERVICE INFORMATION

Beginning in calendar year 2009 some Nissan vehicles are filled at the factory with a NEW Genuine Nissan Long Life Antifreeze/Coolant (LLC) that is blue in color.

This “blue” LLC is designed to have a longer service interval of 10 years or 135,000 miles.

At this time vehicles that are equipped with the blue LLC **still have a Recommended Maintenance Interval for coolant of 4 years or 60,000 miles.**

The new blue LLC is not yet available from the Nissan Chemicals Program.

The green-colored Nissan LLC P/N 999MP-AF000P is backwards-compatible with the blue LLC and can be used to “top-up” cooling systems filled with the blue LLC.

NOTE: Adding green LLC to blue LLC reduces the life of the blue LLC from 10 years or 135,000 miles to 4 years or 60,000 miles.

Continue to follow the current recommendation of always use a mixture ratio of 50% Nissan LLC and 50% demineralized or distilled water when adding or replacing coolant.

CAUTION: You must always mix LLC with demineralized or distilled water otherwise the life of blue or green LLC will be degraded and cooling system damage may occur.

Nissan Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. NOTE: If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Nissan dealer to determine if this applies to your vehicle.
